

PRE-ORDERED BEVERAGES

Beverages to be flown in will not count against your 100# weight limit when ordered in advance. If your group requires lots we advise you pre-order your beverages. Beer and pop weigh 20# per case. Bottled water weighs in at 30# per case. We will fly all this into the lake in advance for you when ordered at least 1 month in advance. Water at the outpost is lake water. We have been drinking it all our life as do most of our clients. If you are concerned about bacteria the health unit recommends boiling it for 5 minutes or bringing bottled water. The current rates are \$60/case for beer and \$20/case for pop and water. This is cheaper than hiring an additional plane. We can get the following brands of beer and all popular Coke and Pepsi products. Please let us know your order in advance or if you have any questions.

If you bring your own beverages and are overweight, any beer, pop, or water, will be removed immediately to get your party within the allowed limits – no questions asked. This will be done to keep the plane on schedule and guests moving in a safe and timely fashion. Please plan accordingly. You can pre weigh your gear and beverages at home to avoid any issues.
